

Bugs found: 5

1. Use of uninitialized variable 'x' in printf.
2. Missing check for NULL return value from malloc.
3. Array index out of bounds: loop condition 'i <= 5' accesses index 5 of an array with 5 elements.
4. Buffer overflow: 'strcpy' copies a string longer than the size of 'buf'.
5. Memory leak: allocated memory 'arr' is never freed before the program exits.
