

Bugs found: 5

1. Memory leak in leak() function: allocated memory for pointer 'x' is not freed before the function returns.
2. Use of uninitialized local variable 'uninit' in the printf statement.
3. Missing include directive for string.h, which is required for the strncpy function.
4. Buffer overflow in strncpy: the size argument (15) exceeds the destination array 'str' capacity (10).
5. Double free error: free(p) is called twice on the same memory address.
