

Bugs found: 5

1. Heap buffer overflow: strcpy writes "BufferOverflowTest" beyond the 16-byte allocated buffer.
2. Stack buffer overflow: memcpy copies 16 bytes into dest, which is only 8 bytes long.
3. Use of uninitialized variable: x is used before being initialized.
4. Division by zero: x is divided by 0 when computing y.
5. Double free: data is freed twice.
