

**Bugs found: 3**

1. Off-by-one error in loop condition: ' $i \leq 4$ ' causes out-of-bounds access on `arr[4]` (valid indices are 0–3).
2. Uninitialized variable: '`soma`' is declared but never assigned a value before being passed to `printf`.
3. Unused computation: the loop fills '`arr`' but its values are never used or summed into '`soma`'.
