

Bugs found: 3

1. Buffer overflow: array 'nome' is declared with size 3, but the loop accesses index 3 (nome[3]), which is out of bounds.
2. Missing null terminator: the char array 'nome' is not null-terminated, making it an invalid C string for use with string functions.
3. Off-by-one error in loop condition: the loop uses 'i <= 3' instead of 'i < 3', causing one extra iteration that reads past the end of the array.
