

Bugs found: 3

1. `ConcurrentModificationException`: modifying a list (via `remove`) while iterating over it with a `for-each` loop.
2. Integer overflow: adding 1 to `Integer.MAX_VALUE` wraps around to `Integer.MIN_VALUE` due to fixed-width signed integer arithmetic.
3. `ClassCastException`: casting `objs[0]` (which holds a plain `Object` instance) to `String` at runtime will fail.
