

Bugs found: 3

1. `ArrayIndexOutOfBoundsException`: array is size 10 but loop iterates `i` from 0 to 19, accessing indices up to 19.
2. Integer overflow: `Integer.MAX_VALUE + 5000` wraps around to a negative value due to signed 32-bit integer overflow.
3. Empty list iteration: `removeIf(s -> true)` removes all elements, making the subsequent for-each loop iterate over nothing, so no output is ever printed.
